## 1. Qualitative Information on Financial Results, etc. for the First Quarter Ended March 31, 2021

### (1) Details of operating results

During the first quarter of the consolidated fiscal year under review, despite the recovery in China and signs of recovery in developed countries such as Japan, the United States and Europe, the outlook for the global economy remained uncertain due to the re-expansion of the COVID-19 and the re-restriction of economic activities.

The Toyo Ink Group's business environment remained challenging, as consumer spending was still in the process of recovering both domestically and overseas. In addition, plant damage at several raw material manufacturers and stagnation logistics caused difficulties in procuring raw materials. In this environment, the Group responded to these challenges and worked to realize its annual policies of "enhancing the profitability of its businesses," "creating and expanding priority development areas," and "enhancing the value of management resources for sustainable growth." As a result, net sales in the first quarter of the fiscal year under review increased to 68,359 million yen (up 7.8% year on year), which was higher than the same period of the previous fiscal year due to the spread of new corona viruses. In addition, operating profit increased to 3,527 million yen (up 17.4% year on year), ordinary profit was 4,222 million yen (up 112.3% year on year), and Profit attributable to owners of parent came to 3,159 million yen (up 171.9% year on year).

Operating results by segment are as follows.

From the first quarter of the fiscal year under review, the Company changed the classification of reportable segments for certain businesses. Comparison and analysis for the first quarter of the fiscal year under review are based on the new classification.

#### (i) Colorants and Functional Materials Related Business

Demand for high performance pigments and materials for LCD color filters was strong for use in TVs, tablets, and displays for PCs due to restraint on going out. We also made progress in expanding sales in Taiwan and China.

In commodity-type pigments, sales for information-related printing inks remained sluggish, but those for liquid inks were firm. Demand for digital printing in inkjet inks recovered, particularly in China and other countries.

Sales of plastic colorants in Japan were firm for food compounds due to restraint on going out for the mainstay compounds, and sales of products for automobile and office equipment were strong in other countries. In Europe and Southeast Asia, we are moving ahead with the withdrawal from unprofitable bases according to targets.

As a result, overall sales in this segment rose 16.6% year on year, to 18,516 million yen, and operating profit rose 70.8%, to 1,176 million yen.

#### (ii) Polymers and Coatings Related Business

In functional films and tapes, sales of conductive adhesive sheets and electromagnetic shielding films for smartphones, for which demand is strong, were strong, and sales of heat durable and low adhesive films for LCD panels and automobile applications were strong.

In adhesives, sales of products for packaging, such as snacks and pet foods, were firm domestically, and sales of products for food also recovered abroad. In pressure sensitive adhesives, demand for use in labels in Japan was firm, while domestic and overseas demand for use in polarizing films was strong. However, rising raw material prices weighed on earnings.

In the can coatings, demand for can coatings for beverage cans applications in Japan was robust due to the consumption of home goggles. Overseas demand recovered in China and Thailand. As a result, overall sales in this segment increased 9.7% year on year, to 16,285 million yen, and operating profit increased 2.3%, to 1,196 million yen.

#### (iii) Packaging Materials Related Business

In Japan, sales of liquid inks for use in paper bags for souvenirs and apparel were sluggish due to restraint on going out. However, sales of products for household food items such as frozen foods and noodles were firm, and sales expanded. Demand also recovered for use in construction materials. In overseas, sales recovered from the same period of the previous fiscal year, when operations were suspended in China, and were also strong in India and the Middle East. On the other hand, profits were squeezed by soaring raw material prices and procurement difficulties on a global basis, as well as expenses associated with the transfer of plants in China.

In the gravure cylinder platemaking business, sales of precision plate-making related to electronics were strong, but sales for packaging were sluggish.

As a result, net sales for this segment as a whole increased to 17,047 million yen (up 4.4% year on year), but

operating profit decreased to 717 million yen (down 16.0% year on year).

(iv) Printing and Information Related Businesses

Structural contraction in the information-related printing market was further advanced by the spread and prolongation of the infectious disease of the new corona viruses and the limitation of economic activities. Domestic sales for flyers, advertising, and publishing were sluggish, but we made progress in improving our business structure, including collaboration with other companies in the same industry, cost reductions, and the passing on of a portion of the increase in raw material prices to sales prices.

Overseas, demand recovered in China, where operations were suspended in the same period of the previous fiscal year, and sales for paper containers, such as food and medical products, were firm. In line with demand, we worked to optimize our global supply system and rebuild the business structure of each base.

As a result, overall sales in this segment rose 0.5% year on year, to 16,156 million yen, and operating profit rose 12.1%, to 263 million yen.

(v) Other

This report covers businesses not included in the above segments, as well as services provided by TOYO INK SC HOLDINGS CO., LTD. and other means. Net sales decreased to 1,543 million yen (down 0.5% year on year), but operating profit increased to 181 million yen (up 218.1% year on year) due to a decrease in retirement benefit expenses and other factors.

(2) Details of financial position

Total assets at the end of the first quarter under review were 384,724 million yen, up 4,496 million yen from the end of the previous fiscal year. Liabilities were 164,600 million yen, an increase of 1,697 million yen from the end of the previous fiscal year. Net assets were 220,124 million yen, an increase of 2,798 million yen from the end of the previous fiscal year.

Assets, liabilities, and foreign currency translation adjustments held in foreign subsidiaries increased due to the yen's depreciation against foreign currencies compared to the exchange rates at the end of the previous fiscal year on the last day of the first quarter of the fiscal year under review. In addition, investment securities, deferred tax liabilities, and unrealized gains on available-for-sale securities each increased, reflecting rising stock prices in Japan. On the other hand, cash and deposits decreased due to the effect of the last day of the previous fiscal year being a holiday for financial institutions and the purchase of treasury stock.

(3) Information on the consolidated earnings forecasts and other future forecasts

The forecast for the fiscal year ending December 2021 remains unchanged from the one announced on February 12, 2021.

(Additional information)

(Application of tax effect accounting in the transition from the consolidated taxation system to the Group tax sharing system)

The Company and some domestic consolidated subsidiaries did not apply the provisions of paragraph 44 of the "Implementation Guidance on Tax Effect Accounting" (ASBJ Guidance No. 28, February 16, 2018) in accordance with the treatment of paragraph 3 of the "Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to the Group Tax Sharing System" (ASBJ Practical Issues Task Force No. 39, March 31, 2020) for items for which a review of the non-consolidated taxation system was conducted in conjunction with the transition to the Group Total System established in the "Act on Partial Revision of the Income Tax Act, etc." (Act No. 8 of 2020) and the transition to the Group Total System. The amount of deferred tax assets and deferred tax liabilities is based on the provisions of the pre-revision tax law.

(Accounting estimates regarding the impact of the COVID-19 coronavirus pandemic)

There have been no material changes in the accounting estimates assumptions related to the impact of the spread of the COVID-19 described in (Additional Information) in the previous fiscal year's securities report.
