## 1. Qualitative Information on Financial Results, etc. for the First Three Quarters Ended September 30, 2023

### (1) Details of operating results

During the first three quarters of the consolidated year under review, the global economy recovered modestly, bolstered by various policies amid improvement in the employment and income situation; however, the outlook remains uncertain, with consumers pulling back on spending because of higher prices and energy prices remaining stubbornly high due to the protracted Ukraine conflict.

In this environment, the Toyo Ink Group worked to achieve its policies for the year of enhancing the profitability of its businesses, creating and expanding priority development areas, and enhancing the value of management resources for sustainable growth.

As a result, net sales increased to 238,235 million yen (up 1.4% year on year), operating profit increased to 9,131 million yen (up 72.0% year on year), and ordinary profit increased to 9,772 million yen (up 35.1% year on year) in the first three quarters of the fiscal year under review. However, due to the decrease of gain on sale of investment securities, profit attributable to owners of parent dipped to 7,219 million yen (down 17.6% year on year).

Operating results by segment are as follows.

#### (i) Colorants and Functional Materials Related Business

In materials for LCD color filters, production at LCD panel manufacturers started to recover in the latter half of the first three quarters under review, and shipments also increased, in addition to increased sales in China and expansion of market share in Taiwan.

Sales of plastic colorants for containers and construction material films were sluggish in Japan due to consumer pullbacks and a drop in housing construction starts; however, sales of plastic colorants for solar cells were strong overseas.

Sales of inkjet inks were impacted by inventory adjustments in overseas markets but started to recover in the latter half of the first three quarters under review. Sales of lithium-ion battery materials for automotive applications grew through the ramp-up of supply in the U.S. and Europe, and the Group is expanding facilities to meet further expansion in demand in the U.S. and China.

As a result, net sales for this segment as a whole increased to 60,539 million yen (up 2.6% year on year), and operating profit increased to 2,109 million yen (up 55.4% year on year).

#### (ii) Polymers and Coatings Related Business

Among functional films and tapes, functional films for smartphones started to recover in the latter half of the first three quarters under review, owing partly to sales expansion efforts, while materials for LCD panels, etc. were lackluster amid continued adjustment in the market.

Slow growth in domestic sales of pressure sensitive adhesives for labels and displays was offset by increased sales of pressure sensitive adhesives in the U.S., India and China. Sales of adhesives for packaging in Japan and overseas were sluggish due to a downturn in consumption, while sales of adhesives for industrial use in overseas markets were strong, attributable partly to efforts to expand sales of adhesives for lithium-ion batteries.

Domestic sales of can coatings were subpar, reflecting slow growth in customer operations, and overseas sales of coatings for food cans were also weak, mainly due to a decline in fish catches. However, the Group made steady progress in its business expansion as a result of efforts to expand sales in Turkey and the acquisition of a local coating manufacturer in Thailand.

Consequently, this segment achieved growth in both revenues and income, partly attributable to the effect of price revision. Net sales as a whole came to 57,186 million yen (up 0.8% year on year), and operating profit were 3,726 million yen (up 107.6%).

(iii) Packaging Materials Related Business

In the liquid ink products market in Japan, restrained purchases among consumers due to rising prices led to slow growth in demand for packaging materials for food products, and sales decreased compared to a year ago when there were customer inventory increases due to expectations of difficulties in procurement. Sales of products for cardboard boxes were also lackluster as demand for fruit and vegetable applications declined due to extreme heat and surging prices.

Overseas, demand in India was solid and sales also held firm; however, sales of products for food packaging were weak due to sluggish consumption in China. Profitability also improved both in Japan and overseas thanks to progress with the revision of selling prices in response to rising raw material prices.

In the gravure cylinder platemaking business, while sales of products for packaging were firm, partly owing to efforts to capture new demand, sales of precision platemaking related to electronics were weak.

As a result, net sales for this segment as a whole increased to 62,431 million yen (up 0.5% year on year), and operating profit increased to 2,575 million yen (up 302.0% year on year).

(iv) Printing and Information Related Business

While domestic sales of products for flyers, advertising, and publishing were sluggish due to the continued structural contraction of the information-related printing market, sales of products for paper containers and packaging were firm partly attributable to efforts to bolster sales. In face of persistently high energy and raw material costs, the Group continued to reduce costs through collaboration with competitors and business structure reforms while at the same time making revisions to selling prices to cover cost increases the Group could not absorb through its own efforts.

In overseas markets, sales were lackluster, partly due to economic downturn in China caused by property market woes and weak exports; however, sales of functional coatings for paper containers and packaging increased.

As a result, net sales of the overall Printing and Information Related Business increased to 56,404 million yen (up 1.2% year on year), and operating profit increased to 941 million yen (up 27.5% year on year).

(v) Other

This Other segment includes businesses not included in the above segments, services provided by Toyo Ink SC Holdings Co. Ltd., etc., and other businesses. Net sales for the first three quarters under review increased to 4,086 million yen (up 10.3% year on year), but operating loss of 199 million yen (operating profit of 776 million yen in the same period of the previous fiscal year ) mainly due to a decrease in revenue from the rendering of services.

**(2) Details of financial position**

Total assets at the end of the first three quarters under review stood at 443,504 million yen, up 32,326 million yen from the end of the previous consolidated fiscal year. Liabilities were 189,692 million yen, up 6,392 million yen from the end of the previous consolidated fiscal year. Net assets came to 253,811 million yen, up 25,934 million yen from the end of the previous consolidated fiscal year.

On the last day of the third quarter of the fiscal year under review, the exchange value of the yen decreased from its level on the last day of the previous consolidated fiscal year. As a result, assets and liabilities held by overseas subsidiaries and foreign currency translation adjustments increased respectively. Property, plant and equipment also increased as a result of the construction of a new plant overseas. Furthermore, investment securities, deferred tax liabilities, and valuation difference on available-for-sale securities each increased, reflecting rising stock prices in Japan. On the other hand, notes and accounts payable - trade decreased, reflecting a decline in inventory. Additionally, some long-term loans payable were restated as short-term loans payable because they will mature within a year.

**(3) Information on the consolidated earnings forecasts and other future forecasts**

In the first three quarters of the consolidated fiscal year under review, the global economy recovered modestly, bolstered by various policies amid improvement in the employment and income situation; however, the outlook remains uncertain, with consumers pulling back on spending because of higher prices and energy prices remaining stubbornly high due to the protracted Ukraine conflict.

In this operating environment, the Group expects to post net sales below the initial targets given sluggish sales volume growth in the first half of the year due to weakness in the LCD panel market, electronics market, and Chinese market. Although a recovery was seen in the second half of the year, it was not sufficient to offset the first half.

However, profit is continuing to improve thanks to progress in cost cutting and sales price revisions through business structure improvement and other initiatives to respond to soaring prices of raw materials, energy, and other items. After factoring in the impact of foreign exchange gains arising from the depreciation of the yen, profits are expected to exceed the initial targets.

Due to the above, the Group has thus changed the full-year consolidated results forecast for the fiscal year ending December 31, 2023 that was announced on February 14, 2023. For details, please refer to the "Notice Concerning Revisions to Full-Year Consolidated Financial Results Forecasts" announced on November 10, 2023.

(Application of Accounting Standard for Fair Value Measurement, etc.)

The Company started to apply the Implementation Guidance on Accounting Standard for Fair Value Measurement (ASBJ Guidance No. 31, June 17, 2021; hereinafter the "Fair Value Measurement Accounting Standard Implementation Guidance") at the beginning of the first quarter. Moving forward, the Company will apply the new accounting policies prescribed in the Fair Value Measurement Accounting Standard Implementation Guidance in accordance with transitional measures stipulated in Paragraph 27-2 of the Fair Value Measurement Accounting Standard Implementation Guidance. The application of the accounting standard has no impact on the consolidated quarterly financial statements.

**(Additional information)**

(Application of the Practical Solution on the Accounting and Disclosure Under the Group Tax Sharing System)

The Company and its consolidated subsidiaries in Japan made a shift from the consolidated taxation system to the group tax sharing system in the first quarter of the fiscal year. Consequently, regarding accounting processing and disclosures for income taxes, local corporate income taxes and tax effect accounting, the Company started to apply the Practical Solution on the Accounting and Disclosure Under the Group Tax Sharing System (Accounting Standards Board of Japan (ASBJ) Practical Issues Task Force No. 42 issued August 12, 2021, hereinafter "PITF No. 42"). In addition, based on Paragraph 32-(1) of PITF No. 42, the Company considers that there will be no impact of changes in its accounting policy resulting from the application of PITF No. 42.
