## 1. Qualitative Information on Financial Results, etc., for the First Quarter Ended June 30, 2014

### (1) Details of operating results

During the first quarter of the consolidated fiscal year under review, the U.S. economy remained on a firm recovery trend, while in emerging economies, including China and India, growth slowed slightly. The Japanese economy continued to see sluggish growth due to a reaction to the spike in demand seen before the consumption tax hike.

In the challenging environment, the Toyo Ink Group developed advanced products, bolstered sales globally, and cut costs. However, the Group's earnings were hit hard by sluggish growth in demand and high raw material costs associated with the weaker yen.

Reflecting the situation, although consolidated sales for the first quarter under review rose 5.7% year on year, to 68,168 million yen, operating income, recurring income, and net income declined to 4,300 million yen (down 15.4% year on year), 4,653 million yen (down 17.9%), and 3,207 million yen (down 13.4%), respectively.

Results by segment are as follows (the classification and order of the segments have been changed in the first quarter under review, and the results in each segment for the first quarter under review are compared with the results in the same quarter of the previous fiscal year that reflect the change in the classification and order):

#### (i) Colorants and Functional Materials Related Business

Sales of high-function pigments and materials for LCD color filters were weak in Japan but recovered in Taiwan and South Korea in the latter half of the first quarter under review. Sales of these products expanded in China. However, there was downward pressure on profits, reflecting increasing requests to cut the costs of LCD materials due to intensifying LCD price competition.

Domestic sales of commodity-type pigments for printing and residential wall painting were weak due to the effect of the consumption tax hike, but sales of commodity-type pigments expanded in China.

Sales of plastic colorants in Japan were adversely affected by the consumption tax hike, but demand, especially for plastic colorants for containers and caps of beverage bottles, recovered in the latter half of the first quarter. In China, South Korea, and Southeast Asia, sales of plastic colorants for containers and for office equipment expanded.

As a result of the above factors, sales in the overall Colorants and Functional Materials Related Business increased to 19,049 million yen, up 5.3% year on year, but operating income declined 17.9%, to 1,799 million yen.

#### (ii) Polymers and Coatings Related Business

In the coating materials segment, sales of advertising-related products were strong, reflecting demand from mass retailers associated with renovation. Sales of products associated with electronics, including electromagnetic shielding films for smartphones and protection films relating to liquid crystal, expanded in China but saw sluggish growth in Japan and South Korea.

Sales of adhesives used for solar cells and for packaging were sluggish in Japan, but sales of adhesives for packaging expanded in China and Southeast Asia. Sales of adhesive compounds for labels were strong in Japan and Southeast Asia, and sales of adhesive compounds for displays grew in South Korea. Sales of resins for print ink were weak, but sales of resins for building and civil engineering were strong. Operating income from adhesives, adhesive compounds, and resins saw sluggish growth, reflecting tardiness in passing high raw material costs in Japan on to sales prices.

Domestic sales of can coatings (finishes) for cans for coffee and similar beverages were weak in Japan due to an increase in coffee sold over the counter at convenience stores. Sales of can coatings for cans for beer and similar beverages grew, and sales of can coatings expanded in Southeast Asia.

As a result of the above factors, sales in the overall Polymer and Coating Business rose 8.2% year on year, to 14,664 million yen. However, operating income declined 5.8%, to 903 million yen.

**(iii) Packaging Materials Related Business**

Domestic demand for gravure inks for packaging for drinks and foods declined only slightly after the consumption tax hike. Domestic sales of gravure inks for printed construction materials to be exported were strong, but those for publications continued to decline. There was downward pressure on operating income from gravure inks due to delays in passing high raw material costs on to sales prices.

Sales in the gravure cylinders business were on a par with the year-ago level, but sales of gravure equipment declined from a year earlier.

Overseas, sales of eco-friendly inks for packaging in the largest market segment expanded in China, Southeast Asia, and India. Demand for gravure inks for construction materials remained strong in North America.

As a result of the above factors, sales in the overall Packaging Business increased 1.8% year on year, to 14,984 million yen. Operating income declined 11.5%, to 397 million yen.

**(iv) Printing and Information Related Business**

In offset inks, sales of advanced products increased, including products with high UV sensitivity and hard coat products used in touchscreens. However, demand for sheet-fed printing, offset rotary printing, and newspaper inks was weak due to a structured recession resulting from the shrinking printing market associated with digitization and the significant effect of the consumption tax hike. Operating income declined significantly, as raw material prices remained high and the Company held off on passing the high raw material prices on to sales prices.

Demand was weak for both equipment and supplies for graphic arts, reflecting the sluggish domestic offset printing market.

Overseas, demand continued to grow in China, Southeast Asia, and India. The Company utilized the ARETS Group acquired in April 2013 in a bid to expand the UV ink business mainly in Europe. In Brazil and India, the Company started the operation of a second production base to develop its supply system to meet expanding demand.

As a result of the above factors, sales of the Printing and Information Related Business stood at 19,955 million yen, rising 7.8% from a year earlier, before the consolidation of the ARETS Group. However, operating income declined 47.7% year on year, to 463 million yen.

**(v) Others**

This segment includes businesses that are not included in the other segments and services provided mainly by TOYO INC SC HOLDINGS CO., LTD. Sales in this segment stood at 1,336 million yen, down 0.5% year on year. Operating income increased 25.0%, to 727 million yen chiefly due to cost cutting at TOYO INC SC HOLDINGS CO., LTD.

**(2) Details of financial position**

Total assets at the end of the first quarter of the fiscal year under review stood at 334,570 million yen, a decrease of 2,031 million yen from the level at the beginning of the fiscal year under review. Liabilities at the end of the first quarter of the fiscal year under review were 147,882 million yen, a decline of 2,110 million yen from the level at the beginning of the fiscal year under review. Net assets at the end of the first quarter under review stood at 186,687 million yen, an increase of 78 million yen from net assets at the beginning of the fiscal year under review.

On the last day of the first quarter of the consolidated fiscal year under review, the yen was stronger than it was on the last day of the previous consolidated fiscal year, resulting in decreases in the assets, including notes and accounts receivable, liabilities, including notes and accounts payable, and foreign currency translation adjustments owned by overseas Group companies. Because of a rise in stock prices, the market value of investment in securities and net unrealized gains on available-for-sale securities rose.

(3) Information on the consolidated earnings forecasts and other future forecasts

In the first quarter of the fiscal year under review, income fell from the same period of the previous fiscal year, but the results remained almost in line with forecasts made at the beginning of the fiscal year. Thus operating forecasts for the first half of the fiscal year ending March 31, 2015 and forecasts for the full fiscal year ending March 31, 2015, both of which were announced on May 13, 2014, remain unchanged.

2. Matters Relating to Summary Information (Notes)

(1) Important changes of subsidiaries during the term

Not applicable.

(2) Application of special accounting treatment to the preparation of quarterly consolidated financial statements

Not applicable.

(3) Changes in accounting policies and changes or restatement of accounting estimates

Changes in accounting policies

(Application of accounting standards for retirement benefits etc.)

The Group has applied the provisions of the main clause of Article 35 of the “Accounting Standards for Retirement Benefits” (Accounting Standards Board of Japan (ASBJ) Statement No. 26 issued on May 17, 2012; hereinafter “Retirement Benefits Accounting Standards”) and the main clause of Article 67 of the “Guidance on Accounting Standards for Retirement Benefits” (ASBJ Guidance No. 25 issued on May 17, 2012; hereinafter “Guidance”) from the first quarter under review, and the method of calculating retirement benefit liabilities and service costs was reviewed. The method of allocating expected retirement benefits to periods has been changed from the fixed-amount method to the projected benefit method. The discount rate has been changed from a discount rate based on a number of years approximating to the employees’ average remaining service years to a single weighted average discount rate reflecting the estimated timing of benefit payments and amounts for each timing.

The adoption of the Retirement Benefits Accounting Standards and the Guideline is subject to the transitional treatment stipulated by Paragraph 37 of the Retirement Benefits Accounting Standards, and we have made an adjustment for the amount affected by the change in the method for calculating retirement benefit liabilities and service costs to retained earnings at the beginning of the first quarter under review.

As a result, at the beginning of the first quarter under review, net defined benefit asset declined 1,521 million yen, and retained earnings fell 979 million yen. The effect on earnings in the first quarter under review is minor.

### (Important subsequent events)

#### Transfer of fixed assets

On June 8, 2012, the Company concluded an agreement to transfer fixed assets based on a resolution at a meeting of the Board of Directors held on the same day. The transfer was completed on July 2, 2014. Details are as follows:

#### (1) Reason of the transfer

The Company has reviewed the functions of the Group's bases and has decided that it is best to move the Company's department and affiliate at 1-3356-47 Kaga, Itabashi-ku, Tokyo to an adjacent area and other places and to transfer the land to another company.

#### (2) Transferee

Nomura Real Estate Development Co., Ltd.

#### (3) Assets to be transferred and the use of the assets before the transfer

Assets to be transferred: Land at 1-3356-47 Kaga, Itabashi-ku, Tokyo

Use before the transfer: Technology building, R&D building, office building, and warehouse

#### (4) Transfer price etc.

Book value 364 million yen

Transfer price 7,483 million yen

#### (5) Effect of the transfer on earnings

In the first half of the fiscal year ending March 31, 2015, a gain on sales of fixed assets of 6,438 million yen (transfer price less the book value and expenses associated with the transfer) will be posted as an extraordinary profit.

The results forecasts for the fiscal year ending March 31, 2015 announced on May 13, 2014 had already factored in the extraordinary profit associated with the transfer of fixed assets and will not be changed.
